

Marvin Minhaz

Data Scientist | Python & SQL | IBM Certified

Noida, India | +919954775505 | marvinminhaz@outlook.com | LinkedIn | GitHub

PROFILE

Entry level Data Scientist with a strong foundation in Python, SQL, and the end to end data science lifecycle, encompassing EDA, data wrangling, predictive modeling, and visualization. Demonstrated ability to engineer production-ready open-source Python packages, published on PyPI and actively maintained on GitHub. IBM and Meta Certified with hands-on experience in macro-economical analytics, panel data econometrics and time-series analysis. Proficient in Linux-based environments, reproducible data pipelines, and version control workflows.

TECHNICAL SKILLS

Languages and Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, C, HTML/CSS.

Tools & Platforms: Git/GitHub, Jupyter Notebooks, VSCodium, Zed, Linux(Bash/CLI, Debian, Fedora).

Competencies: Open-Source Development, Web Scraping & APIs, Shell Scripting, Statistical inference, Hypothesis Testing, Data Pipeline Engineering.

PROJECTS

Methodverse - Python Built-in Methods Reference Engine

- Designed and published a lightweight Python reference engine for built-in methods on PyPI, actively maintaining version control and full documentation.
- Demonstrated end-to-end software engineering principles by taking the open-source project from initial development to deployment and community contribution.

NVIDIA Stock Price Analysis (1999-Present)

- Conducted a 25-year historical analysis on NVDA stock by leveraging the Yahoo Finance API to extract, clean, and transform large-scale financial datasets.
- Engineered a data pipeline with Pandas and Matplotlib to visualize time-series data, correlating stock performance with NVIDIA's strategic pivot from graphics hardware to AI dominance.

Trade, Economic Stability & Democracy (1980-2024) - A Panel Data Analysis

- Investigated empirical relationships between trade dependence, GDP volatility, inflation, and democratic institutions using multivariate panel data econometrics across 44 years of global data.
- Applied rigorous statistical inference and hypothesis testing to validate findings, producing a comprehensive analytical framework on globalization's impact on institutional stability.

EDUCATION

Master of Science - Data Science Symbiosis International (Deemed University)	Pursuing
--	----------

Bachelor of Arts (Hons) - Political Science Indira Gandhi National Open University — Score: 68%	2023–2026
---	-----------

Class XII - Science Assam Higher Secondary Education Council (AHSEC) — Score: 75%	2019
---	------

WORK EXPERIENCE

Co-Founder

Puhor Foundation - Non-Profit Organization — Nagaon, Assam, India

Co-founded and scaled a non-profit foundation delivering flood relief in Assam and COVID-19 pandemic response. Analyzed regional operational data to optimize resources and aid distribution across multiple districts.

CERTIFICATIONS

- IBM: Data Science Professional Certificate
- University of Michigan: Python for Everyone & Access to Web Data
- Meta: Version Control & Introduction to JavaScript
